Field summary for 6.01

AVALON is a project funded by the European Commission and is concerned with developing our understanding of how languages can be learned in Second Life. As a part of this project, we are running a number of pilot activities. These activities involve both research and the creation of material for use both as a part of the project and for other teachers to use when the project has finished. In order to conduct the research and create the material we will audio and video record some of the lessons, take photos, save the text and audio conversations and ask you to fill in questionnaires or to be interviewed about this experience. Responses to questionnaires and interviews will be confidential, however, some of the recordings or the text chat that we use in the materials creation will inevitably show your Avatar name (your name in the virtual world). Please click "Yes" to say that you understand what this project involves and that you are agreeing that the project can make use of the recordings, pictures, text and audio chat and questionnaire data for the purposes both of research and the presentation of the findings at conferences and the creation of teaching and learning materials.
